

## THE WALTER REED ARMY INSTITUTE OF RESEARCH

### *Center for Infectious Disease Research*

Infectious diseases have been afflicting Soldiers and civilians alike for centuries. Since the WRAIR's inception, our primary challenge has been disease prevention based on evaluation, control, and treatment of naturally occurring infectious diseases.

#### ***Research Branches***

- Bacterial Diseases
- Entomology
- Military HIV Research Program (MHRP)
- Military Malaria Research Program (MMRP)
- Preventive Medicine
- Viral Diseases

#### ***Did you know...***

- Infectious diseases have traditionally been the greatest threat to a Soldier's health and readiness both in the field and in the garrison
- US troops have confronted a wide variety of pathogenic viruses, bacteria, and parasites in recent missions to Somalia, Haiti, Iraq and Afghanistan

503 Robert Grant Avenue Silver Spring, MD 20910
